

Assembly Instructions
No tools are needed for assembly.

Note: These instructions are also used for the Contour and Wide profile seats, Model 106 Option - A & B. Caster guards are pre-assembled.

www.eidosergonomics.com

Step 1: The Model 106 standpipe collar placement will determine the overall seat height. The higher the collar is placed on the standpipe, the lower the seat height and vice versa. Note: 7.5" measured from the bottom of the standpipe to the top lip of the collar is the Maximum (lowest position) ensuring the standpipe will not touch the ground.

Do Not apply weight until the desired position has been configured.

Step 2: Place the standpipe and collar into the pan by holding the top of the collar (minimize vertical movement of collar) apply pressure downward.

Step 3: Place the round, contour or wide-profile seat onto the gas spring.

Step 4: Apply weight and enjoy your Eidos Ergonomics Model 106.

Warranty: Eidos products are covered by a limited warranty for a period of five years from date of purchase.
